

Dániel Császár

18 November 1988

Self Definition

I am a pragmatic person with a mind for understanding and building complex systems and solutions. When working in a team, I love to bring out the best in me and my colleagues. I thrive on challenge, so I always welcome the chance to learn and grow.

Mentor Opinion

"It was fantastic to work together with Daniel, who is one of the greatest talent in Codecool. The field of programming is much more like a playground for him, where he can build anything he can imagine. Daniel is inspiring and motivating for his colleagues, he was the one, who always provided elegant solutions. Give him the really challenging tasks, the ones that everyone else is struggling with, and he will get them done. Don't let him get bored."

— Faragó Balázs, Mentor

Strengths

Hard

- Angular 6
- ReactJS And React Native
- Redux (NgRx, Saga)
- Node JS / Typescript
- Java / Spring Boot
- WebSocket, GraphQL

Soft

- Experience With Presentation
- Mentoring Skills
- Agile
- Scrum
- Fast Learner
- Passion For Programming

Has experience working with modern web development technologies on both sides of the stack, including modern front-end frameworks. Adept at coaching colleagues and doing presentations.

Main Interests

I am mainly interested in web development and it's related technologies. I am well-versed in Angular 6 and React, although I also have experience with multiple different backend solutions, like NodeJS and Java Spring MVC. I have been using Redux for state management in my recent projects, NgRX in the case of Angular. Besides these, I am always interested in trying out new ways of doing things, like building GraphQL or WebSocket based APIs and clients. I have also been experimenting with mobile development using React Native. My other, less technical interest is to have the opportunity to pass on my knowledge to my peers, to see them grow thanks to my help.

Recent Projects

- Mercury Social Media Application — [Repository Link](#)

A social media app using Angular 6 and 5 microservices with multiple backend technologies, including my own Java microframework, Spring, NodeJS, GraphQL and Websockets.

- Social Mobile App — [Repository Link](#)

React Native event handler / chat app with NodeJS and MongoDB backend.

- Webshop — [Repository Link](#)

An online webshop built using Java servlets, JDBC with PostgreSQL, and JWT token generation on the backend, Angular 6 and custom CSS on the frontend.

Education

- Eötvös Loránd Tudományegyetem, Political Science MA (2013-2015)
- Eötvös Loránd Tudományegyetem, Political Science BA (2010-2013)

Work Experience

- Magyar-Kínai Új Befektetők Szövetsége, secretary general (2016-2017)
- KELLO Könyvtárellátó Nonprofit Kft., team leader (2014-2016)

Peer Recommendations

” Daniel has very good architect skills, he can think of a project as a whole and able to separate it very well. He's very helpful and able to explain things in a very understandable way. He has deep knowledge of web related technologies. He always tries to achieve the best, and not afraid to learn new things. It's a pleasure to work with him because he has huge work morale and good attitude.

— Ádám Fehér

” I think it is really good to work with Daniel. He is always helping everyone and motivating others. He often gives small presentations on different technological topic to help others understand the newest trends. He leads with good example, all the time looking for opportunities to improve his skills. He is very reliable and hardworking. You can be sure that he'll always get the job done.

— Máté Horváth

Interesting Things About Me

I like spending time with my friends and loved ones doing various activities, such as hiking and having a beer, or both at the same time. I am also a huge fan of tabletop games and paper-and-pencil RPGs.
